

Monitoring

USA Fire Protection

USAFP installs a radio that connects to your fire alarm pull station, smoke detectors, and fire sprinkler system.

Your system is monitored 24/7 in case the system detects heat, smoke, or fire.

If an alarm gets triggered, the radio notifies the operator immediately.

The operator will then notify you and the fire department as necessary.

Call or visit USAFP at: 847-816-0050
