

# 5 COMMON WINTER-TO-SPRING FIRE PROTECTION PROBLEMS

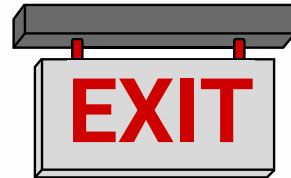

## Freeze-Related Damage

Inspections help identify early warning signs and address issues before they become severe.

## Fire Alarm Monitoring Issues

Inspections and testing verify operation, integrity, and signal transmission.

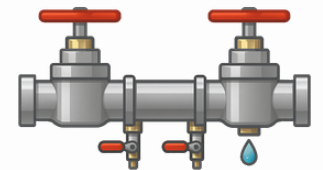

## Emergency & Exit Light Outages

Testing confirms emergency lighting will perform during a power outage, keeping tenants safe.

## Fire Extinguisher Deficiencies

Inspections verify units are the right type, in the right location, accessible, and properly charged.

## Backflow Preventer Issues

Testing and service help detect and address any issues early before they turn into costly repairs.

**Stay safe and code-compliant with USAFP's all-inclusive inspections, testing, and maintenance (ITM) services!**
